Event Name: Characteristics and risks of supply chain management in new energy vehicle manufacturing industry

Venue: online; Event No. 21296; Date & Time: March 03, 2021; 20:00-21:30

Event Hours: 1.5 h; Professional Development Points: 1.5

Event Introduction :

New energy vehicles have effectively replaced fossil energy with green energy in the field of travel. All developed countries have incorporated the research, development and promotion of new energy vehicles into their national strategies. The guest speakers of this seminar have accumulated some experiences in the supply chain of power battery cathode materials industry due to their work. I hope to share and communicate with you to learn from each other and make progress together.

1. Why do we need to know the cathode materials of lithium batteries?
2. Status quo of cathode materials for lithium batteries
3. Supply chain status and pain points of lithium battery cathode materials
4. Possible ways to cope
5. Opportunities and challenges of cathode materials in the future

我们助您创未来

Instructor Introduction

Sean Qin

CPIM, PMP, CQE, ISO9001 auditor

He has more than 15 years of working experience in supply chain and quality management, covering many industries such as large-scale manufacturing, fast cost products, chemical raw materials, etc
