我们助您创未来

#### Event Introduction

This presentation will guide you through the application of MCDM to support decision-making processes in complex supply chains. Through real-world case studies and essential considerations for implementing MCDM, we aim to help you enhance your decision-making process, ultimately improving the efficiency and sustainability of your supply chain. So, join us and learn how to make the best decisions for your supply chain in today's complex business environment.

#### Instructor Introduction

#### Dang Viet Linh

#### Postdoctoral Fellow at the MIT Global SCALE Network' s Ningbo China

Institute for Supply Chain Innovation (NISCI). His main research interests are supply chain digitalization, warehouse operation management, shipping and port management, and port hinterland connectivity.

He has published extensively on such topics as analyzing the development of seaports, inland container depots - ICD, dry ports, and hinterland networks in Southeast Asia. Before working at NISCI, He was Warehouse Manager of TI LOGIS, Korea, which provides logistics solutions for many multinational enterprises in the semiconductor & biotechnology industry, such as Thermo Fisher Scientific, Entegris, CMC Materials, and ASM International.

He obtained his Ph.D. in Logistics Management from Incheon National University, Korea. His dissertation deployed multiple-criteria decision analysis (MCDA) in a fuzzy environment to investigate the determinants in prior implementations of dry port construction and find the order of priority for dry port construction.
