### Contents Introduction :

Production during epidemic prevention: On the one hand, customers are pressing for urgent delivery, while at the same time, the enterprise is short of manpower and machinery...The most critical is the lack of materials - has become a real constraint! As a supply chain management decision maker, you need to make quick decisions. In addition to what you've already thought, Production expert Philip Zhang also advises you:

- 1.Set up the company "war room"
- 2.Filter sort customers and orders
- 3.Set up material control mechanism
- 4.Set up material guarantee system
